1996 Garrison Command Directory

1996

Garrison Command

Directory

Acknowledgements:

The publication of this directory would not be possible without the help and support of the following people:

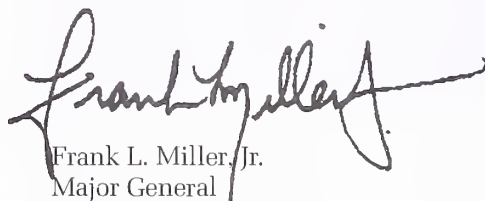

- The garrison staff personnel who collected and submitted the entries for each post.
 - Ms. Penny Schmitt and the Customer Relations staff of the US Army Center for Public Works, for their expert guidance and help throughout the planning and execution of the project.
 - Ms. Susan Shugars at RPI Marketing Communications, Baltimore, Maryland, for the excellent directory layout and design.
-

Introduction

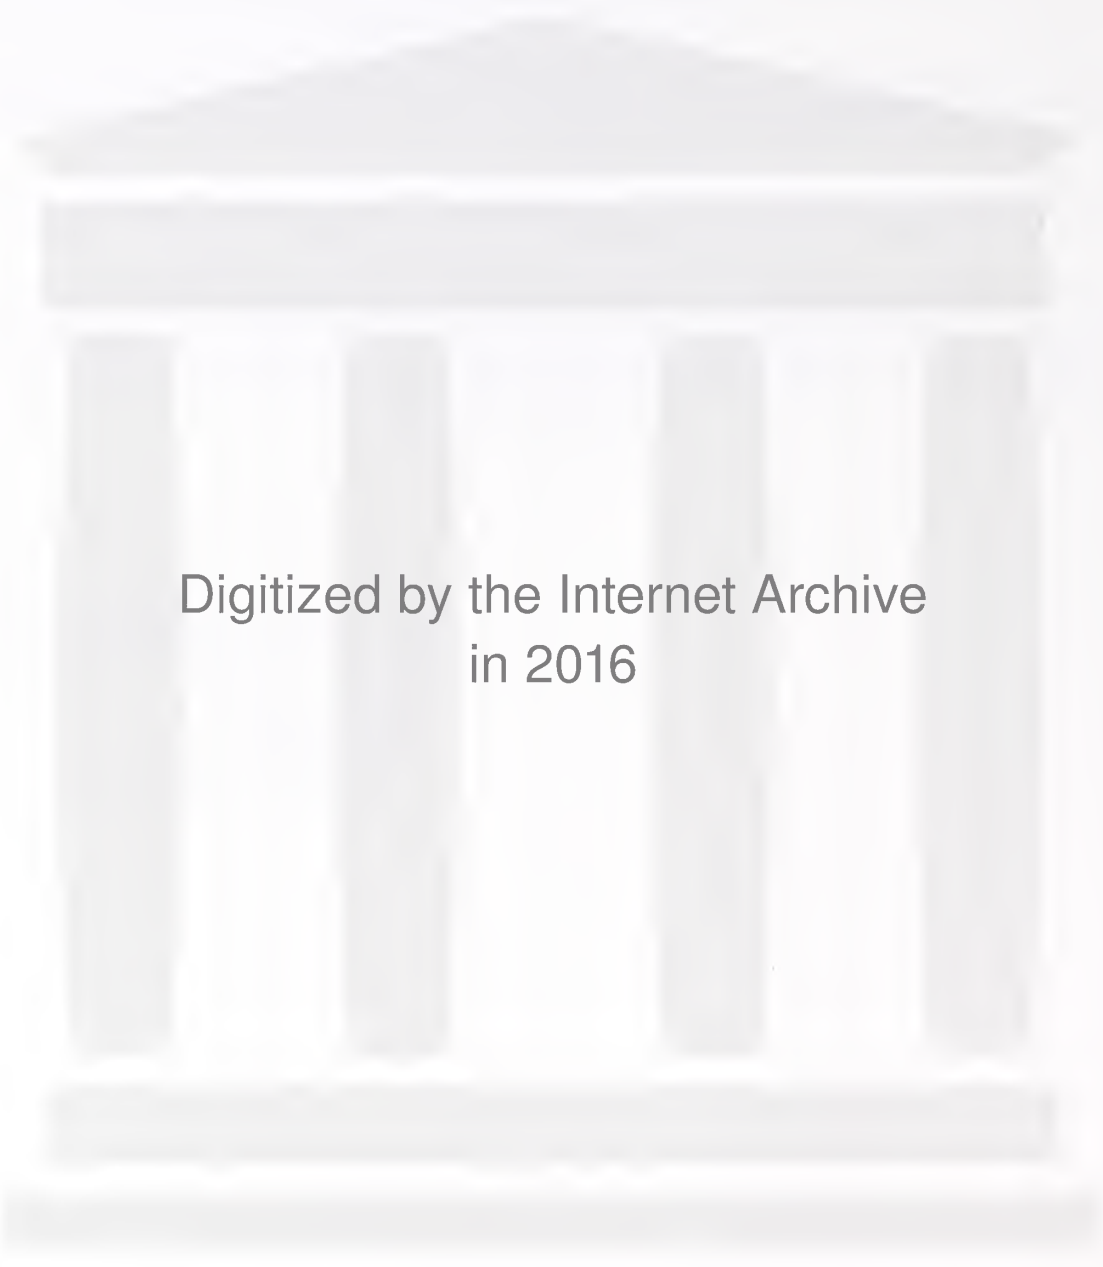

I am pleased to introduce the 1996 Garrison Command Directory. This directory is published to provide you with a handy reference to reach your counterpart commanders, as well as the key members of each garrison team—senior civilians and senior NCOs.

The directory highlights the background of each commander, provides a profile of the post, and lists the telephone, telefax, internet, and postal information necessary to communicate with other garrisons.

The directory will allow you to stay in touch and share good ideas and other critical information with those who are having similar challenges in improving and caring for the Garrisons that will promote READINESS and make LIFE better for the soldiers, the civilians and the families that will make our Army GREAT tomorrow and well into the future. Use it and recommend changes that will make it more valuable to you.

Frank L. Miller, Jr.
Major General
Assistant Chief of Staff
for Installation Management

Aberdeen Proving Ground, the Army's oldest active proving ground, is one of the world's foremost research, development, testing, and training facilities for military weapons and equipment. It is bounded by the Susquehanna and Gunpowder Rivers, the Chesapeake Bay, and the AMTRAK Railroad.

The US Army Garrison, Aberdeen Proving Ground, is host to and provides a full range of support services to 58 tenant organizations and 26 private organizations. In addition, the garrison provides select support services to 31 satellite organizations in both CONUS and OCONUS.

APG comprises two principal areas, separated by the Bush River. The northern area is known as the Aberdeen Area, and the southern sector, formerly the Edgewood Arsenal, is the Edgewood Area. Many of APG's tenants are located in the Edgewood Area and conduct work in environmental and chemical arenas. They include the Chemical and Biological Defense Command, Army Environmental Center, Chemical Demilitarization and Remediation Activity, Medical Research Institute of Chemical Defense, and the Center for Health Promotion and Preventive Medicine.

While actively testing military hardware, environmental protection is a major concern. The Proving Ground has developed an environmental program that has made it a haven for bald eagles and other wildlife.

DSN Phone: 571-7142

As a result of the ongoing downsizing of the Department of Defense military and civilian forces, Anniston Army Depot continues to reorganize to further streamline operations for increased efficiencies and overall cost savings.

Additionally, the depot was instrumental in establishing a "Teaming with Industry" consortium wherein the depot, Jacksonville State University and area businesses share technology applications for the benefit of all.

Internet: siobgsgm@bluegrass-emh1.army.mil

Strategically located in the heart of the Eastern United States, Blue Grass Army Depot is situated along major traffic corridors crisscrossing the famed Blue Grass region of Kentucky.

The depot's main mission is to provide munitions, chemical material surveillance and Special Operations support to the Department of Defense. The depot also provides allied trades and fabrication support to a government-owned/contractor operated facility and is a primary center for surveillance, receipt, storage, issue, testing and minor repair of chemical defense equipment.

Many Reserve and National Guard units have found the mild climate and diverse terrain as an ideal location for their training requirements. Blue Grass Depot, a Tier 1 installation, matches its workload with that of the units to provide realtime training opportunities and increase the depot's productivity.

CSM Larry Harper

Garrison Command Sergeant Major

Assigned: June 1995

Located in the Northern California Bay Area, Camp Parks is a vital part of the total Army in the Western United States. A sub-installation of Fort McCoy, we are the only training facility within a short drive for 10,000-plus reservists in the San Francisco Bay Area, where firing ranges and a wide variety of training facilities are available.

The post is home to state-of-the-art facilities: the Regional Training Site-Intelligence, Regional Training Site-Medical, and the 91st DIV Battle Simulation Center. Growth is on the horizon for Camp Parks as new facilities have been programmed for construction in the near future.

Camp Parks plans to enter the 21st century as a center of training excellence that will enhance our reputation as the Western Spearpoint of the Reserve component.

Corpus Christi Army Depot is a full service facility that seeks and meets the challenges of global military demands through three major missions: (1) overhaul, repair, modernization of all Army and most DoD rotary wing aircraft, (2) training for Reserve, National Guard, active duty, and foreign military personnel, (3) additional depot maintenance support including on-site maintenance teams, crash damage analysis, and chemical and metallurgical support.

Population served: 10 military personnel, 3,000 DA civilian employees, 135 contract employees.

Size: 190 acres, 2,000,000 square feet of building space.

DSN Phone: 482-1825

Internet: ocnco@crane-emh1.army.mil

COL James C. King

The mission of Crane Army Ammunition Activity is to produce and renovate conventional ammunition and ammunition related components. In addition, CAAA receives, stores, ships, demilitarizes and disposes of conventional ammunition and related items. The products and services are provided to all branches of the armed services.

Located on 100 square miles, including more than 60,000 acres of woodland and streams, the CAAA was established in 1977 as a result of the Single Manager of Conventional Ammunition concept. The Activity is a tenant at the Crane Division, Naval Surface Warfare Center in Crane, Indiana.

The CAAA has entered into a unique and especially productive interservice support agreement with its host activity for interchange of services and work effort, and receives support from about 220 Crane Division personnel.

More than 1,700 magazines are strategically located in the rolling hills of southern Indiana where some 600,000 tons of ammunition-related stock are stored, thus making it one of the largest ammunition depots in the Army.

Dugway Proving Ground is a Department of Defense Major Test and Range Facility and the primary chemical and biological defense testing center under the Reliance Program. Here, in a unique and remote setting, testers can determine the reliability and survivability of all types of military and commercial equipment in simulated chemical or biological risk environments. Dugway maintains staff core competencies for testing in many specialty areas, including chemical defense, biological defense, smoke and obscurant, incendiaries and munitions.

Dugway Proving Ground, larger than the state of Rhode Island, covers 1,300 square miles in Utah's Great Salt Lake Desert. The terrain varies from salt flats to sand dunes and rugged mountains. The post employs 650 civilians, 100 military and nearly 600 contract employees. The staff includes more than 100 scientists and engineers, most of whom hold doctoral degrees in the chemical and biological sciences. Many of the staff have specialties in atmospheric modeling, meteorology, instrumentation design, and biological and chemical containment design.

DSN Phone: 943-8106

Fitzsimons Army Medical Center has an illustrious history dating back to 1918 when Recuperation Camp No. 21 was established to treat victims of World War I gas attacks and tuberculosis. Since that time, FAMC has treated casualties from every major conflict involving American troops.

Gaining new status as one of eight Army Medical Centers with the inception of the US Army's Health Services Command in 1973, FAMC is a center for Graduate Medical Education, training the Army's physicians, nurses and enlisted personnel.

FAMC is also home to 13 tenant organizations, including the world headquarters of the Civilian Health and Medical Program of the Uniformed Services.

Although FAMC is recommended for closure under the 1995 Base Realignment and Closure Act, it currently treats active and retired beneficiaries from a 14-state region. Under the closure plan, FAMC is scheduled to downsize to a troop medical clinic by July 1996 and implement TRICARE in the region by the fall of 1996.

Assigned: July 1993

DSN Phone: 578-8205

Located 25 miles south of Fredericksburg, Fort A. P. Hill encompasses nearly 80,000 acres making it the sixth largest military installation on the East Coast. Named for Confederate general and Virginia native Lieutenant General Ambrose Powell Hill, the fort was established by the War Department in 1941. It served as a staging and maneuver area for US-based troops during World War II. Since then, the post has provided soldiers with combat arms training during the Korean, Vietnam and Persian Gulf Wars.

Today, as in the past, Fort A. P. Hill is recognized for the high level of tactically realistic training it provides for soldiers. The post offers artillery, mortar, land navigation, hand-to-hand combat, rifle and pistol training and supports both active and reserve component units of all branches of the armed services.

Last year, more than 150,000 active duty and reserve component soldiers, members of other services, and other government agency personnel trained at Fort A. P. Hill.

Every four years, the fort hosts the National Boy Scout Jamboree. More than 30,000 scouts participate in the two-week event, transforming the post into the third largest city in Virginia.

In October, 1994, Fort A. P. Hill became a sub-installation of Fort Belvoir.

Fort Belvoir is the premier administrative support center in the National Capital Region and a strategic sustaining base for America's Army. The garrison provides logistical and administrative support to 122 separate tenant and satellite organizations, including two Army major command headquarters.

Located on 8,600 acres about 10 miles south of Washington, Fort Belvoir is home to several key academic institutions, including the Defense Systems Management College, the Defense Mapping School, the Army Management Staff College, the Army Force Management School, and the Army Inspector General Course.

Fort Belvoir has just completed the largest base realignment and closure construction project undertaken by the Department of Defense. The Headquarters Complex will be home to the Defense Logistics Agency and four other DoD agencies. When fully occupied, the Headquarters Complex will add about 4,000 military and civilians to the current post population.

Fort Benjamin Harrison is scheduled for closure by July 1997. The Soldier Support Institute at Fort Jackson was activated in September 1994, with the training mission beginning the transfer to its new home in Fort Jackson. The Soldier Support Center will inactivate in September 1995. The training mission transfer will be completed by October 1995, at which time the post will become a sub-installation of Fort Knox until closure.

DSN Phone: 978-5031

Internet: liddicc@bliss-emh1.army.mil

Fort Bliss is the home of the Army's Air Defense Artillery Center and School. It is TRADOC's largest installation, with over 50 percent of TRADOC's land mass, the Army's largest airfield (Biggs Army Airfield), and is the Army's largest training installation.

Fort Bliss conducts enlisted training from initial entry through the Army's Sergeants Major Academy, and officer training from basic through pre-command courses, as well as a wide range of technical and weapons systems-related courses.

Located adjacent to White Sands Missile Range, the Army's largest testing installation, Fort Bliss enjoys significant maneuver training space, a superb range complex, and is well suited to serve as a power projection platform for America's Army.

Major tenants include the Joint Task Force Six, The Sergeants Major Academy, the 11th Air Defense Artillery Brigade, and the 3rd Armored Cavalry Regiment.

Fort Bragg

XVIII Airborne Corps & Fort Bragg

Attn: AFZA-GC
Fort Bragg, NC 28307-5000

COL John W. May, Jr.
Garrison Commander

SGM Johnny U. Kitchens
Garrison Sergeant Major

Assigned: August 1995

DSN Phone: 236-1525

Internet: kitchenj@bragg-emh5.army.mil

Fort Bragg, established as a field artillery base in 1918, presently is "Home of the Airborne." The 155,000 acre post is located 50 miles southeast of Raleigh and 10 miles northwest of Fayetteville. We are North Carolina's sixth largest city and bring nearly \$3 billion in direct and indirect economic impact to the local economy.

Fort Bragg is at the forefront of reengineering the way the Army does business - we have been charged to lead FORSCOM's Installation XXI initiative for the XVIII Airborne Corps. Our goal is to develop and implement the most efficient installation structure for the delivery of goods and services to the Army of the 21st century.

We are a leader in endangered species conservation. There are currently five endangered species on the installation - two animals and three plants. All five species restrict training activities and present us with a challenge to strike a reasonable balance between mission accomplishment and conservation of our environment.

Fort Buchanan

Fort Buchanan

Attn: AFZK-B-CO

Fort Buchanan, PR 00934-5000

The only active Army installation in the Caribbean, Fort Buchanan is a Lead Mobilization Station responsible for the training, support and mobilization of nearly 16,000 reserve component soldiers in Puerto Rico and the US Virgin Islands. Active, reserve and civilians work closely together in what constitutes a prime example for the entire Defense establishment of a Total Army community at work.

The post supports 55 federal agencies stationed on the island, and is active in military and federal government initiatives to maintain stability in the area, and deal with counter-narcotics efforts.

Serving a total population of 90,000-plus, Fort Buchanan comprises 746 acres in the heart of the San Juan metropolitan area.

Assigned: March 1995

DSN Phone: 962-2083

Fort Chaffee has a tradition in training. Beginning with three armored divisions during World War II through the JRTC, Fort Chaffee has provided a wide variety of realistic and meaningful training opportunities. With the departure of JRTC, reserve component training support reemerged as Fort Chaffee's primary mission. Concurrent with the RC reemergence, active component training also continues to rise to new levels with the availability of the installation's exceptional training areas and facilities.

In all, more than 55,000 active and reserve component soldiers trained at Fort Chaffee during FY 1995. The tradition will continue through 1997 when the installation will transfer to the Reserve Component stewardship under BRAC 95.

Population served: 506 (including 140 post and tenant military and 366 post and tenant civilians).

Size: 112 square miles, including 63,000 contiguous acres of maneuver area of varied terrain.

The United States Army Garrison - Panama is a forward-deployed, multi-dimensional provider of community, mission and quality of life support.

The garrison is comprised of 12 Army defense sites located in the Atlantic and Pacific communities providing for the operation, safety, logistics, security, procurement, education and training, and community support services to units and activities in the designated areas of responsibilities, including logistics support to US embassies and military groups in Latin America.

USAG - Panama is currently undergoing the first phase of the 1977 Panama Canal Treaty Implementation Plan. By the end of September 1995, the United States will transfer the properties of Forts Davis and Espinar to the Government of Panama. Fort Sherman, the home of the Jungle Operation Training Battalion (JOTB) will be the only US installation remaining on the Atlantic side of the Isthmus until 31 December 1999.

Population served: 965 soldiers as well as 2,500 civilian employees and 43,000 customers.

Size: 70,000 acres and 16,000,000 square feet in over 2,800 buildings.

Of note: Fort Clayton received the Chief of Staff, Army Communities of Excellence 1995, Honorable Mention Award and the 1995 DOD Award for Outstanding Work and Family Programs.

Fort Detrick is a Community of Excellence with a challenging role in the national defense. Those working at Fort Detrick are engaged in advanced biomedical research and development, medical materiel management, medical intelligence and global telecommunications for the White House, Department of Defense and other governmental agencies.

During the past year, Fort Detrick has experienced several positive transitions and reorganizations. The BRAC 95 initiative will double our military strength, a combined Logistics and Engineering Directorate will improve installation support while eliminating duplicate resources and the regionalization of finance and civilian personnel functions are just a few of the actions that have occurred.

Also, following a reorganization of the Army Medical Department, a new command, the US Army Medical Research and Development Command (USAMRMC) was established at the post. USAMRMC combines the US Army Medical Materiel Command and the US Army Health Facility Planning Agency with medical R & D operations.

Population served: 940 soldiers and 3,800 civilians (including contractor employees).

Size: 1,150 acres.

Fort Eustis is located on the James Rive in Hampton Roads, Virginia. It is collocated with HQ TRADOC and the Joint Warfighting Center at Fort Monroe and Air Combat Command at Langley AFB. Across Hampton Roads is Atlantic Command at Norfolk Naval Base. Fort Eustis is the home of the US Army Transportation Corps, which includes the Transportation Center and School, the Aviation Logistics School, and the Joint Strategic Deployment Training Center. Located at Fort Eustis is Third Port, a deep water port which provides a safe harbor for the Army's watercraft fleet and serves as a deployment platform for Army units. In addition, it is a joint service training facility for watercraft operators and cargo handlers.

Fort Story, a major sub-installation, is located at Cape Henry, at the juncture of the Chesapeake Bay and the Atlantic Ocean. It is the prime location and training environment for both Army amphibious operations and Joint Logistics-Over-the-Shore (LOTS) training events.

Fort Eustis is also home to the 7th Transportation Group (Composite), the Army's most deployed unit. The 7th Group supported Operation Desert Shield/Desert Storm, Operation Restore Hope, Operation Provide Hope, Operation Vigilant Warrior, as well as support for Rwanda. It is currently support Operation Maintain Democracy in Haiti.

hendrixj@profs.gordon.army.mil

Named for Confederate Lieutenant General John Brown Gordon, the installation was first activated as Camp Gordon and was used for infantry and armor training during World War II. Other facilities at the camp included a US Disciplinary Barracks and a prisoner of war camp for German and Italian captives. Camp Gordon became the site of the Signal Corps Training Center and the Military Police School in 1948. The camp became a permanent Army installation in 1956 and was redesignated as Fort Gordon.

Fort Gordon today is the site of the Eisenhower Army Medical Center and the 513th Military Intelligence Brigade, but it is best known as the "Home of the Signal Corps," housing the US Army Signal Center and School, the world's largest and most sophisticated communications-electronics training center.

Selected as Army's model installation for the 21st century, Fort Gordon is a showcase for state-of-the-art equipment and facilities, and is known for its progressive approach to installation management and administration. Fort Gordon is leading the way to the Army of the next century through strategic community planning, community partnerships, and citizen involvement. Fort Gordon and the cities and towns of the Central Savannah River Area are valued neighbors, trusted community partners, and recognized leaders in city management and public administration, continuously improving both the military and the civilian communities with quality facilities and excellent services.

Fort Gordon won the "Most Improved Installation" category for the TRADOC Communities of Excellence Award, and it was selected as one of two finalists in the "Most Improved" category for the Army Communities of Excellence Award.

Established in 1942, Fort Hood is home to the III Corps. It is approximately 60 miles north of the capital city of Austin and 50 miles south of Waco. Fort Hood is the only post in the United States capable of stationing and training two heavy divisions. The rolling, semi-arid terrain is ideal for multi-faceted training and testing of military units and individuals. Fort Hood is "the Army's Premier Installation to Train and Deploy Heavy Forces."

Fort Hood is home to Headquarters III Corps, 1st Cavalry Division, 2nd Armored Division, 13th Corps Support Command, 6th Cavalry Brigade (Air Combat), 504th Military Intelligence Brigade, 89th Military Police Brigade, 31st Air Defense Brigade, 3rd Signal Brigade, 3rd Personnel Brigade, 13th Finance Group, and the Test and Experimentation Command (TEXCOM). Additionally, 2nd Armored Division has been designated as the Experimental Force component which will evaluate the new equipment, organizations, and concepts of leadership making up FORCE XXI.

As a result of the BRAC process, Fort Hunter Liggett is now a sub-installation of Fort McCoy, Wisconsin. Fort Hunter Liggett will continue to be the home of the TEXCOM Experimentation Center until the unit relocates in 1999.

Fort Hunter Liggett will become the Western Regional Training Center for the United States Army Reserve. The installation has vast training areas available for use by all branches of the armed forces.

Population served: 550 soldiers as well as 1,700 civilians (employees, family members, and retirees).

Size: 164,000 acres; 1,000,000 square feet of space in 236 buildings.

Fort Indiantown Gap is the second most heavily used Reserve Component major training area in the United States, with about 177,000 soldiers and others training here annually. With the recent conversion of the Pennsylvania National Guard's 28th Infantry Division to mechanized infantry, the installation is upgrading its facilities accordingly.

The installation has recently constructed a Table VII tank range, one of only three in the Northeast capable of qualifying both M1 tank and Bradley crews.

Other major installation facilities include an air-to-ground gunnery and bombing range used by Active and Reserve Components of the Army, Air Force, Navy and Marine Corps. The air-to-ground range is computer-scored, and is one of 15 in the nation. The range is used days and nights throughout the year with over 1,300 sorties annually.

The installation is also home to the Eastern Army National Guard Aviation Training Site (EAATS) which is a satellite of Fort Rucker and is one of two such sites in the United States. EAATS trains aviators from all over the US, but is primarily responsible for regions east of the Mississippi River. This site is the second-largest Army Aviation training site in the nation, with more than 90,000 aerial operations per year. The site also houses six helicopter training simulators.

The BRAC 95 Commission has recommended that the garrison inactivate by 30 September 1998, and that the Pennsylvania National Guard assume the mission of managing Fort Indiantown Gap.

Fort Jackson is the Army's largest and most active initial-entry training center, responsible for turning into soldiers about half of the men and women who enter the Army each year.

More than \$50 million worth of new construction is underway in support of the Soldier Support Institute and new Noncommissioned Officer's Academy.

Of note: TRADOC Communities of Excellence Award in eight categories—Logistics, Public Works, Long Range/Strategic Planning, Public Affairs, Adjutant General/Personnel Office, Civilian Personnel Office, Resource Management, and Chaplain Activity. Also, winner of the DA Energy Conservation Award.

Population served: 13,000 soldiers and 3,500 civilian employees. Also, 11,000 family members and 68,000 retirees and their families.

Size: 52,300 acres and 10,400,000 square feet of building space.

Fort Knox, the US Army Armor Center, is a US Army Training and Doctrine Command installation with the primary mission of training soldiers for the Armor Force. However, the post is much more than gunnery ranges, training areas, and tank-filled motor parks. Fort Knox is also home to the US Army Recruiting Command, the great people who "provide the strength" for America's Army. The 2d Region ROTC, Readiness Group Knox, and the US Bullion Depository also call Fort Knox home.

Fort Knox is a Kentucky Certified City. It is the sixth largest urban community in the commonwealth and the largest single employer in the state. It has the largest dependent school system among posts in the continental US.

Of note: Fort Knox is a leader in labor/management partnership efforts.

Population served: 13,807 soldiers and 4,126 civilians.

Size: 109,068 acres and 17,955,059 square feet of building space.

The Combined Arms Center is the oldest continuously active Army installation west of the Mississippi River. Founded in 1827, Fort Leavenworth was instrumental in the opening of the western frontier. Maintaining this proud legacy, with over 100 of the post's facilities listed on the National Registry of Historic Buildings and a part of the Army's second largest historic district, has presented challenges which we have gladly accepted. Home of the Command and General Staff College, the National Simulation Center, and the United States Disciplinary Barracks, our soldiers, families, and employees are our most important assets. We strive to enhance their quality of life to allow them to better serve. A two time winner of best medium sized installation in CONUS attests to our level of success.

Size: 5,600 acres and 7,000,000 square feet of space in 1,000 buildings and 1,500 quarters.

A two-time Army Community of Excellence winner, Fort Lee is a growing, ever-changing community constantly improving our services and facilities. Good neighbor to three cities and three counties, the post has initiated a number of innovative partnerships which benefit the population as a whole.

The Fort Lee area, one of the most historic in the US, dates back to 1645 when Fort Henry was established along the falls of the Appomattox River. Ravaged by both the Revolutionary and Civil Wars, the area figured prominently in the concluding phases of each war.

Fort Lee was built in the shape of a horseshoe to accommodate the progression of infantry trainees in World War I. Civilians entered the Army at one end, progressed through training, then were processed out the other end to deploy with the Army Expeditionary Force to the battlefields of Europe.

Today, the post is home to a number of major Army supply and soldier support functions. As a leader of the Army's worldwide logistics community, Fort Lee's mission activities research, develop, and teach the systems and doctrine that will be the 21st century standard. Both the Quartermaster Center and School and the Army Logistics Management College provide joint service training. Fort Lee is also the home of the Defense Commissary Agency.

We fuel the development of soldiers by shaping a caring community and our environmental program is a "Keep America Beautiful" award winner for the state of Virginia.

Fort Leonard Wood

Fort Leonard Wood is the Army's Engineer Center of Excellence. It has a three-fold mission which provides a full spectrum of engineer training: from Advanced Individual Training and Officer Precommand Courses, to Initial Entry Training and Officer Basic and Advanced courses. It does this while sustaining a quality installation and all-around living environment. We have trained over 3 million soldiers in our 54 year history and play an invaluable role in mobilization, training and development of Reserve, National Guard, and Active Army personnel.

As our mission continues to expand, we are accepting new challenges and proactively breaking long-standing paradigms. The newly launched Integrated Training Review Organization at Fort Leonard Wood brings together Army, Navy, Air Force and Marine personnel to jointly teach engineering and motor transport skills. Our combat developments directorate promotes the engineer vision: Enforce XXI, with the latest in information age technology, to complement the Army's vision for the 21st century; and, anticipating BRAC recommendations, we are organizing to integrate the Army's Military Police and Chemical Schools, into our installation and activities. In these and other ways, Fort Leonard Wood will continue to be one of the Army's premier "Gateways to Excellence."

Wisconsin is the home of Fort McCoy, one of the most dynamic, valuable, and cost-efficient military training installations in the Army's inventory. Having trained over 1 million members of all components of all the military services in the past ten years, it is truly a Total Force Warfighting Training Center.

Fort McCoy is very well situated strategically in the upper Midwest. Training facilities and capabilities available are as lengthy as its proud history. The hilly woodlands and open barrens of the installation mirror similar locations throughout the world. Its four-season climate enables it to operate year around to provide quality training under any climatic condition. Being a model of environmental stewardship for the US Army, Fort McCoy is in full compliance with all environmental regulations and its research and programs are sought and have been exported to nongovernmental organizations.

Modernization efforts have been very dynamic with over \$120 million in major construction since 1990. Besides having a training and mobilization charter, Fort McCoy has the largest off-post support mission in engineering, logistics, personnel management, finance and training support of any military installation in the US.

Fort McCoy has recently been named executive agent for installation management for the US Army Reserve Command. As such, Fort McCoy is the parent installation for three sub-installations: Fort Hunter Liggett and Camp Parks in California and Fort Pickett in Virginia. A fourth, Devens Reserve Forces Training Area in Massachusetts, will become an additional responsibility in FY 1996.

Fort McCoy won the 1995 small installation category in the Army Communities of Excellence Competition.

Fort McPherson, together with its sister post, Fort Gillem, are Forces Command installations. Fort McPherson is located on nearly 500 acres just south of Atlanta. The 110 year old post is one of the oldest in the South. Many of its buildings are on the National Historical Register. Fort Gillem has almost 1,400 acres located 20 minutes by car from Fort McPherson. The posts house and support four major headquarters: Forces Command, 1st US Army, 3rd US Army, and the US Army Reserve Command, as well as numerous other tenants.

Fort McPherson received honorable mention as a small installation competing in the Army Communities of Excellence competition.

Fort Meade, built in 1917 to train troops for service in World War I, was named for Union General George Gordon Meade, hero of the Battle of Gettysburg. The post, located midway between Baltimore and Washington, D.C., has been in continual use through World War II, the Korean and Vietnam wars, and Operation Desert Shield/Desert Storm.

Fort Meade's mission is to provide base operations and other support to Department of the Army, DOD, and other government agencies which are tenants or satellited activities on the installation, and provide support for agencies within a five-state area.

Fort Meade is home to the National Security Agency, the US Army Field Band, the 694th Intelligence Group (Air Force), and Naval Security Group Activity. Recently, the post became home to three DOD media schools, which include the Defense Information School (DINFOS), Defense Visual Information School (DVISH) and the Defense Photography School.

First fortified by Jamestown settlers in 1609, Fort Monroe is one of the Army's most historic posts. The inner fort, begun in 1819, is surrounded by a moat and was state-of-the-art in defense works when built. The 19th Century buildings that make Fort Monroe a charming campus-like area have been renovated and contain up-to-date office facilities inside the historic walls.

Fort Monroe is a National Historic Landmark and is listed on the National Register of Historic Places. The post recently won the Keep Virginia Beautiful Award, Tree City Award, Best Small Installation in TRADOC, ACOE Award (Honorable Mention), and the A. Connelly Award for Post Dining Facility.

The Fort Myer Military Community (FMMC), established in 1993, consists of Fort Myer and Fort McNair. In 1995, FMMC received the Army Communities of Excellence Runner-Up Award for Most Improved Community.

Fort Myer traces its heritage to the Civil War. It is the only active fort of the original 68 forts that guarded Washington, D.C. It is named after Brigadier General Albert J. Myer, founder of the Army Signal Corps. Today, Fort Myer serves as home for the 3d US Infantry (The Old Guard) and the US Army Band (Pershing's Own). Also located here are the homes of the Chairman of the Joint Chiefs of Staff and Chiefs of Staff for the Army and the Air Force. It is the headquarters for the FMMC and is the ceremonial post of the US Army.

DSN Phone: 863-1606

Fort Polk is the home of the Joint Readiness Training Center (JRTC), the 2d Armored Cavalry Regiment (light), the 108th Air Defense Artillery Brigade, and other XVIII Airborne Corps and Forces Command units.

Conceived in the forge of World War II, Fort Polk has transitioned from a training base, the home of 5ID/2AD and heavy division training, and now, the world's foremost light operations training center.

Fort Polk has received honorable mention in the 1994 ACOE competition. Our transient billets won DOD's "Worldwide Lodging of the Year" for 1994 and the Warrior Brigade Dining Facility was awarded the Philip A. Connelly Competition for the best DA dining facility for 1994.

Fort Ritchie is a Military District of Washington installation located on 638 acres in the beautiful Catocin Mountains. Fort Ritchie's primary mission is to provide the National Military Commander Center Site R with logistical, physical security, engineering, contracting and quality of life support. Fort Ritchie is headquarters for the Defense Information Systems Agency-Western Hemisphere, the US Army garrison, the Information Systems Engineering Command, the 1108th Army Signal Brigade, and several Defense tenants.

For the past five years Fort Ritchie has received an honorable mention as a small installation competing in the annual Army Communities of Excellence competition. Fort Ritchie is the only Army installation participating as the federal sponsor for Hagerstown, Maryland, in support of the General Services Administration's Cooperative Administrative Support Unit program which promotes resource sharing, quality enhancement and community bonding.

Population served: 950 soldiers and 1,500 civilians.

This year, Fort Sam Houston celebrates the 150th anniversary of the first posting of soldiers to San Antonio. Throughout its history, the post has served as a headquarters location for commands supporting military operations in Texas and the Southwest.

Today, Fort Sam Houston is the home of several commands with regional and world-wide operational responsibilities, including the Fifth US Army, US Army Medical Command, the Army Medical Department Center and School, and Brook Army Medical Center.

With more than 900 historic structures, the post is listed on the National Register. Fort Sam Houston has won honorable mention in the 1993, 1993, and 1994 Army Communities of Excellence competitions and the Most Beautiful Public Land Award for seven consecutive years. The post's Army Career and Alumni Program was designated the best in the Army in 1995. In 1993, 1994, and again this year, the post Staff Judge Advocate Office received the Chief of Staff, Army's Award for Excellence in Legal Assistance.

Recently completed and planned construction and renovations include a new medical center, new commissary, expanded post exchange and other infrastructure and mission support facilities totaling \$300 million. The use of the Master Installation Planning Program and the support of the DOD Legacy Program preserve the utility of historic structures while allowing for expansion of installation capabilities to accommodate new missions.

Part of the US Army Garrison, Hawaii, historic Fort Shafter is home to the US Army Pacific. The community consists of 1,500 acres in sub-installations surrounding Honolulu: Fort Shafter with USARPAC Headquarters, Corps of Engineers POD, the Fort Shafter Community, the Hawaii Army Reserve Center, Tripler Army Medical Center (TAMC), Aliamanu Military Reservation, Fort DeRussy, and Fort Ruger. The Fort Shafter community consists of over 10,000 military and civilian employees, 3,400 sets of quarters, with 13,500 residents, and serves a large and distinguished group of military retirees.

A Community of Excellence, Fort Shafter was named winner of the ACOE Commander-in-Chief's Award for best medium installation OCONUS in 1995, and was runner up for the most improved post in 1994. A consistently excellent work force and dynamic junior leaders have established Fort Shafter as a community committed to Total Quality and continuous improvement.

In 1995, Fort Shafter was also named a World War II Commemorative Community. The historic Palm Circle parade grounds and senior officer housing area at Fort Shafter is the focal point for many of the community's formal ceremonies. Fort DeRussy is known world-wide as the home for the AFRC Hale Koa Hotel and a beacon for rest and relaxation. TAMC is the largest medical center in the Pacific and commands a most beautiful view overlooking Honolulu and Pearl Harbor. On the forward slope of Diamond Head, the club at Fort Ruger allows fine dining and a relaxed atmosphere overlooking Waikiki.

Fort Sill, home of the US Army Field Artillery Center, recently was recognized as having the Army's best Legal Assistance Office for the seventh straight year, and TRADOC's best contracting office. These are only the latest in a long string of successes for the post. In the last TCOE competition, Fort Sill was cited for having the best Public Affairs, Public Safety, Housing, Military Personnel, ACAP and Legal Assistance programs in TRADOC. Fort Sill is currently the runner up in the ACOE extra large installation category, and remains the only installation to be a three-time winner of the competition.

Historic Fort Story is located in the city of Virginia Beach, Virginia. It is the Army's Logistics-Over-The-Shore (LOTS) training and test site. The post is also the Army's only salt water purification training site for training of reverse osmosis water purification units. In addition to the active Army units, also stationed at Fort Story are Army Reserve units, US Navy active and Reserve units, and USMC section.

Fort Story construction includes a \$5.6 million explosive ordnance disposal training facility which was opened in May 1995, a new youth activities center costing \$1.3 million scheduled to open in September 1995, and a new beach lodging and recreation facility costing \$4.9 million named the Cape Henry Inn scheduled to open in October 1995.

Fort Story is a sub-installation of the US Army Transportation Center and Fort Eustis.

Hunter Army Airfield is located in historic Savannah, Georgia. Savannah, "cradle of Georgia" and first planned city in North America, is a place of unique beauty and old world charm.

In addition to units of the 24th Infantry Division (Mech), Hunter is home to 1st Bn, 75th Rgr Regt; 3d Bn, 360th SOAR(A); US Coast Guard Air Station, Savannah; and the USAF's 117th Tac Con Sqdn (ANG).

Hunter has an 11,000 foot runway that can accommodate any aircraft. This capability is key to Hunter's role as a power projection platform. Diverse facilities such as Hunter's two swimming pools, gymnasium, challenging 18-hole golf course, new (1993) \$1.6 million child development center, and new (1995) \$6.3 million commissary are but a part of the reason Hunter Army Airfield is a great place to live and work.

Mmilitary Ocean Terminal, Sunny Point, is now designated the 1303rd Major Port Command. The post received three successive Honorable Mention Awards in the Chief of Staff, Army's Communities of Excellence competition in 1993, 1994, and 1995.

Sunny Point's mission is world-wide transshipment of DoD ammunition, explosives, and other dangerous cargo. The terminal commander also supervises deployment/redeployment of warfighting units through the state ports of Wilmington and Morehead City, North Carolina. Sunny Point is the only DoD terminal equipped to handle containerized ammunition.

The terminal's safety record is the best in Military Traffic Management Command. Since fiscal year 1992, terminal personnel have worked a record-setting 662 days without a lost time accident, and at present is rapidly approaching 365 consecutive accident free days.

Picatinny Arsenal, like most Army installations, is continuously developing ways to tackle the challenges of downsizing and still provide today's soldiers, sailors and airmen with the finest armament and munitions in the world. The restructuring initiatives have not only proved more efficient but also realized substantial cost savings.

The arsenal is committed to sustain the highest possible quality of life for its work force while continuing to perform basic research, concept evaluation, advanced development, and full scale engineering support for production, fielding and eventual demilitarization.

Population served: 3,700 soldiers, civilian employees, dependents, and retirees.

Size: 6,400 acres and 4,000,000 square feet of building space.

Located in central Arkansas, Pine Bluff Arsenal (PBA) provides the joint services chemical and biological technology, products and services. The Arsenal manages the second largest stateside inventory of chemical weapons and maintains unique production capabilities for a variety of conventional munitions.

As DoD's center of expertise for chemical and biological defensive equipment maintenance and testing, PBA offers the only government owned and operated protective mask rebuild and recertification capability.

Striving for total environmental quality, the Arsenal supports military missions from development through demilitarization. As the only active Army installation in the state, PBA supports the training of reserve units and the needs of the retired military population.

Bordered on the east by the McClellan-Kerr Arkansas River Navigation System and on the west by the Union Pacific Railroad, the Arsenal is easily accessible by rail, road or waterway.

Population served: 55 soldiers, 1,000 civilians, 200 recruiters, 400 Reserve Component troops, 7,000 retirees and dependents.

Located on the Big Island of Hawaii, Pohakuloa Training Area (PTA) is the largest training area in the Pacific Theater. The training area is used by all the Services in the Department of Defense, as well as by Allied forces.

The mission of PTA is to provide user units (up to Brigade(-) in size) with a properly functioning combined arms training facility.

PTA is more than 6,000 feet above sea level and possesses a C-130-capable hardened airfield, 19 ranges, 24 mortar points and unlimited artillery firing positions. Due to PTA's location between two volcanoes and at 6,000 feet elevation, about 24,000 acres of land is off-limits to training because of extensive lava fields and the presence of endangered plants or animals.

Part of the US Army Garrison, Hawaii, the Pohakuloa Training Range is the largest military training area in the Pacific. The range is used by all services in the Department of Defense, as well as allied forces. Recent training deployments representing foreign units include the British Black Watch, Gurkha Regiment, French Tahitian Marines, and the Japanese Self-Defense Force.

Pohakuloa vigorously promotes Total Army Quality in customer service support to training deployments.

The soldiers and civilians at the range are also committed to working closely with the surrounding communities. Pohakuloa was recently recognized with a Community Relations Award of Excellence from Department of the Army for its work with public schools.

SGM Richard Higdem

Garrison Sergeant Major

Assigned: October 1994

DSN Phone: 878-5306

The Presidio of Monterey, which contains the Defense Language Institute Foreign Language Center, became Training and Doctrine Command's newest, and smallest, installation in October 1994. The presidio was a part of the Fort Ord complex until that post closed following the base closure and realignment process. The presidio retained a "footprint," called the Presidio of Monterey Annex, on the former installation to support housing, commissary, and exchange services and child care needs. Since the Naval Postgraduate School has maintained its own Department of Public Works, that organization now provides facilities maintenance support for the Presidio of Monterey and the annex.

The Presidio of Monterey and the Defense Language Institute continually investigate ways to become as lean and cost effective as possible while maintaining the mission - to train, sustain and evaluate Department of Defense linguists.

Population served: 4,400, including 2,900 students and 750 language instructors.

Size: 395 acres, plus 800 acres at the annex.

Red River Army Depot is an innovator in the process of reinventing the organization as part of the National Performance Review. The depot's HEARTS training program - an acronym for Honesty, Ethics, Accountability, Respect, Trust and Support - is the of our cultural change to move toward self-managed work teams and improvements in quality and customer service. The union/management partnerships established at Red River have been cited by the Vice President as an example for others to emulate.

Red River has also received recognition as the winner of the Small Installation Category in the 1994 Army Communities of Excellence competition, and the depot was one of nine finalists from throughout the entire Federal government for the prestigious Quality Improvement Prototype Award presented in 1994 by the Federal Quality Institute.

Population served: 4,000 soldiers, dependents, and civilian employees.
Size: 19,000 acres and 7,808,000 square feet of building space.

Post Sergeant Major

Assigned: January 1995

DSN Phone: 746-5331

Redstone Arsenal is located in the middle of the Tennessee Valley. It's made to order for those who enjoy fishing, hunting, boating, water skiing, picnicking, hiking, biking, or just sitting and looking.

Redstone Arsenal was built in 1941 to produce conventional chemical ammunition for use in World War II. For more than 40 years, Redstone has been the heart of the Army's rocket and missile programs. Dr. Wernher von Braun and his German rocket experts developed the first ballistic missile; this led to the establishment of NASA's Marshall Space Flight Center in 1960.

The Army missile team perfects the high technology weapons that American soldiers use. Today, Redstone is home to the US Army Missile Command and numerous tenant and satellite organizations.

The Arsenal was selected as the ACOE Best Medium-Size Installation in CONUS in 1993 and 1995; first runner-up in 1994; most improved installation in 1992.

Population served: 30,000 soldiers (Active, retired, and dependents) and nearly 20,000 civilians (DA, contractor and nonappropriated fund).

Size: 38,000 acres and 10.2 million square feet of building space.

Rock Island Arsenal is the largest weapons manufacturing arsenal in the free world. The arsenal is a vital part of the national defense structure, providing manufacturing, supply and support services for the US Armed Forces and its allies. Its current production mission includes the M119 105mm Towed Howitzer, and gun mounts for the Abrams tanks and the M109 and M110 self-propelled howitzers.

Rock Island Arsenal was recently certified under the Contractor Performance Certification Program to become the first government-owned, government-operated manufacturing facility certified as a quality performer in the Army Materiel Command.

Population served: 250 soldiers and 7,000 civilians.

Size: 946 acres and 5,000,000 square feet of building space.

DSN Phone: 749-2300

Internet: kblose@pmrma-emh1.army.mil

Rocky Mountain Arsenal is situated nine miles northeast of Denver, on 27 square miles of prairie land. Once an active military installation instrumental in the production of chemical weapons, the mission today is focused on environmental cleanup.

While cleanup work is projected to last many years, much progress has already been made and continues. Programs known as Interim Response Actions, or IRAs, have been designed to solve immediate environmental problems while the final cleanup solutions are determined. A Record of Decision is expected in 1996.

The arsenal is a paradox. It was formerly one of the country's largest wartime production sites, is currently one of the largest Superfund cleanup sites, and ultimately upon cleanup will be designated the largest urban National Wildlife Refuge. More than 230 wildlife species live at the arsenal, including mammals, birds, reptiles, amphibians, and fish.

The arsenal population includes three military personnel and 170 civilians.

Schofield Barracks, constructed in 1909 on the Leilehua Plain between the Waianae Range and the Koolau Range. The post was chosen to defend Pearl Harbor's northern approach. Schofield Barracks Community encompasses all Army facilities in the northern part of the island of Oahu. Schofield is the home of the 25th Infantry Division (Light) and the US Army, Hawaii. Other major tenants include the 703rd Military Intelligence Brigade as well as units from all of the military services. This diverse community has been a four time winner of Army Communities of Excellence awards.

Additions to the Schofield Community such as 600 new housing units at Heleman and Schofield, construction of the new family support center at Heleman, the new four seasons store, the new sports dome, and new golf club house have increased the quality of life for all community citizens. Many more improvements, including a new commissary, are planned to ensure Schofield continues to be a community of excellence.

The Tank-Automotive and Armaments Command Support Activity Selfridge, is located at Selfridge Air National Guard Base, Michigan. The post is a subordinate command of the US Army Tank-Automotive and Armaments Command (TACOM). Selfridge is a joint military community located 22 miles east of Warren, Michigan, on beautiful Lake St. Clair.

As the last base in Michigan, we support a population of 50,000 people. It is the only base in the US to have all five services working together toward a common goal - providing quality service and support to eligible members. We have saved millions of dollars working together and our military organizations and families have experienced a richer quality of life. Because of this commitment to work together, we have developed a spirit of partnership. We call this "Team Selfridge."

Internet: umda@tooele-emh1.army.mil

LTC Marie L. Baldo

Umatilla Depot Activity is located in northeastern Oregon. As a result of BRAC '88, the focus of the mission recently changed from one of storage and maintenance of conventional and chemical ammunition and general supplies, to static storage of chemical ammunition. Once the chemicals are destroyed, the installation is scheduled to close.

The chemical munitions are scheduled to be destroyed by October 2003. Until then, Umatilla will continue the safe and secure storage of these items.

Several environmental sites have been identified for cleanup prior to base closure. All cleanup is expected to be completed by the time the chemicals are destroyed with one exception. One site has explosives-contaminated groundwater. The cleanup identified for this site is to pump and treat the water. This could take as long as 30 years.

The three posts that make up the US Army Garrison, Alaska - Forts Richardson, Wainwright, and Greely - work together to provide a strategic power projection platform and excellent training facility for the combat forces, support elements and tenant activities associated with US Army, Alaska (USARAK).

Located near the port city of Anchorage and adjacent to Elmendorf Air Force Base, Fort Richardson is the headquarters for the garrison and for USARAK, as well as home to the only airborne infantry battalion in the Pacific.

Fort Wainwright, 350 miles north and adjacent to Fairbanks and Eielson Air Force Base, provides thousands of acres of training land for USARAK and multi-service exercises. Unique training opportunities range from traversing glaciers to air assaulting onto ranges that are sweltering mosquito-infested swamps in summer and 50 degrees below zero and miles of snow and ice in winter.

Remote Fort Greely, with only about 400 soldiers but with more than 600,000 acres of training land, is located near the Canadian border. It is home to the Cold Regions Test Activity and Northern Warfare Training Center.

The US Army Garrison, Hawaii, consists of the Fort Shafter Community, Schofield Barracks Community, and the Pohakuloa Training Range Community, listed elsewhere in the directory.

The garrison provides base operations support and services to the soldiers of the 25th Infantry Division (Light), 45th Corps Support Group (Forward), HQ US Army Pacific, and other tenants.

In April 1995, the "Tropic Lightning" Division soldiers returned home from their successful three month peacekeeping mission in Haiti. the force structure of the 25th Infantry Division (Light) was recently realigned and as a result of the Army's downsizing to 10 Divisions, lost one brigade from the Schofield Barracks Community. The loss of this brigade has been offset with the addition of one brigade at Fort Lewis which will be the 1st Brigade, 25th Infantry Division (Light).

A five time winner of the Chief of Staff, Army's ACOE award, we continually strive to exercise environmental stewardship, improve operations and provide the best service to our customers. Two of the five coveted awards were received in 1995: Schofield Barracks, large OCONUS and Fort Shafter, medium OCONUS. Through the tenets of Total Army Quality, we feel confident to meet the objectives of the Army Installation Management Action Plan and challenges of the National Performance Review.

Located 50 miles north of New York City in the scenic Hudson River Valley, the US Army Garrison at West Point is the oldest continuously occupied military installation within the Department of Defense. Since January 1778, West Point has played a significant role in the history of the US from its very beginnings in the American Revolutionary War to the post-Cold War world of today.

The US Military Academy, founded in 1802, provides the nation with leaders of character who serve the common defense. West Point is three institutions in one. It is an Army community of excellence, the Army's service academy—home of the US Corps of Cadets, and a national historic landmark.

The garrison's vision is to provide a professional environment that supports the Academy's purpose and mission while maintaining an azimuth to modernize and protect West Point as a national institution and historical landmark.

Walter Reed Army Medical Center is the Army's largest health care delivery system. The installation commander also serves as the Commanding General, North Atlantic Health Service Support Area, and as the higher headquarters for the Walter Reed Health Care System and treatment facilities.

Walter Reed is more than 28 acres in floor space and supports more than 2,500 outpatient visits per day. More than 23,000 patients are admitted and discharged annually.

The tenant activities include the North Atlantic Dental Service Support Area, the North Atlantic Veterinary Support Area, Armed Forces Institute of Research, the Army-Defense Medical Information Systems, the US Army Physical Disability Agency, and the Armed Forces Pest Management Board.

The main installation (113 acres) where clinical activities are housed is complemented by the Forest Glen Annex (183 acres) which contains a modern exchange, commissary and child development center, and by the Glen Haven Annex (174 acres), located in Montgomery County, Maryland, which houses 210 enlisted families.

Founded in '83 to support the "Second War of Independence," Watervliet Arsenal is the oldest, continuously active arsenal in the United States. In 1897, Congress approved the establishment of a "National Cannon Factory" and Watervliet was chosen as the site.

Today, Watervliet Arsenal produces the finest large caliber cannon in the world. From recoilless rifles and mortars to howitzers and tank guns, and even the massive 16-inch battleship guns, Watervliet Arsenal's products are unmatched.

While the entire arsenal is listed on the National Register of Historic Sites, Watervliet Arsenal remains one of the most modern manufacturing facilities to be found anywhere - public or private sector.

Located on the banks of the historic Hudson River just seven miles north of the state capital at Albany, Watervliet is situated in the heart of the Northeast Corridor, a day's drive from Montreal, Boston, New York, the Great Lakes, et cetera. This ideal location, which figured into Watervliet's original selection as the cannon factory, now is being considered by other government agencies as a site for relocation and consolidation.

Watervliet Arsenal continues to live up to its motto: "A quality product, on time, at the right price, safely."

The 20th Support Group provides combat service support, base operations, and installation support for Area IV at three major military enclaves in Korea.

Camps Henry, George, and Walker are located within the city of Taegu (the "Apple Capital"). Originally build by the Japanese during their occupation of Korea, Taegu is now home to the 20th's headquarters, the 19th Theater Army Area Command, and other tenant units.

Camp Carroll, in Waegwan, was named in honor of SFC Charles F. Carroll who died in action during the Korean War and was posthumously awarded the Distinguished Service Cross for heroism. Camp Carroll primarily supports supply, storage and maintenance missions.

Camp Hialeah, in the port city of Pusan, began as a horse racing track for the Japanese during their occupation of Korea. Camp Hialeah provides the primary support facilities for McNab Compound at Cheju-do Island, Pusan's Pier 8, and the Pusan Storage Facility at Pier 6.

The 22d Area Support Group provides command and control of Vicenza, Livorno, and Verona BASOPS activities. It is responsible for the development and execution of plans, training, and operations to include: information and personnel security, readiness training and support of contingency plans. Responsible for logistics activities of assigned units; manages supply, services, maintenance, contractual, transportation activities, real estate, real property maintenance, facilities, and installation utilities. Controls matters relating to law and order. Provides quality of life support activities to the US Army Southern European Task Force (USASETAF) and supported units.

Caserma Ederle, home of the US Army Southern European Task Force and the 22d Area Support Group headquarters, is located on the east side of Vicenza, Italy. Vicenza is famous for Renaissance architect Andrea Palladio's architectural wonders such as the Rotunda and Teatro Olimpico. Vicenza is about a half hour's drive west of world-renowned Venice and two hours south of the Alps. The population of Vicenza is about 160,000. The area around Vicenza is dotted with vineyards, farmland and industry. The thriving downtown area contains dozens of historical places, churches and villas. The Basilica, another Palladio creation, anchors the main downtown market area which has its major weekly market day Thursday mornings.

Camp Humphreys is best known for running the largest and busiest Army Airfield OCONUS. In addition to six aviation units with fixed and rotary-wing aircraft, key intelligence, signal, medical, and logistics organizations operate at Camp Humphreys. It is also the home of the Eight US Army Confinement Facility and the Korean Augmentation to the United States (KATUSA) Training Academy.

Camp Humphreys was a 1993-1994 ACOE finalist in the category of most improved installation.

During the past year, the Area Support Group has gone through several organizational changes. In October 1993, we nearly doubled our area of responsibility with the addition of two Base Support Battalions. In May and June 1994, we consolidated our operations with the deactivation of two Base Support Battalions and one Support Battalion.

The ASG has also been involved in the drawdown and restationing of forces in Germany, with several tenant organizations moving in and out of the ASG. Throughout this period, the ASG has continued to provide service to the soldiers, family members and civilians working and living in our communities.

Population served: 18,200 soldiers and 48,950 civilians.

Size: 19,559 square kilometers and 53,295,150 square feet of building space.

Yongsan Garrison is located in the heart of the capital city of Seoul, South Korea. Although Seoul boasts a population of over 11,000,000, Yongsan Garrison enjoys the lifestyle of a suburb of a small city.

Yongsan Garrison is home to the quad-headquarters of the United Nations Command, US-ROK Combined Forces Command, US Forces Korea and the Eight US Army. In addition, over 100 tenant units to include all headquarters for the Major Subordinate Units (MSUs) are located in Yongsan. The 34th Support Group's responsibilities include installation base operations and support to all units in Area II, some twenty-two installations and sub-installations with a supported population in excess of 25,000 personnel.

Yongsan serves as the entertainment and logistical support hub for the peninsula with thousands of US Military and civilian personnel coming to The Dragon Hill Lodge, 121st General Hospital, Yongsan Commissary, Army and Air Force Exchange Service facilities, as well as the numerous Morale, Welfare and Recreation activities provided. Our soldiers, families, employees and volunteers are our most important assets. Yongsan won the ACOE first place medium size category OCONUS award in 1992 and 1994, and was runner-up in the ACOE large size OCONUS category in 1995.

The 104th Area Support Group is comprised of two Base Support Battalions in Darmstadt and Hanau. The Group's mission is to support readiness within an area of responsibility slightly larger than Switzerland by maintaining a power projection platform for deployable units, a training base for 20 battalions, and a home for the total force of approximately 38,000 soldiers, civilians, and family members. The Group maintains two active airfields, three Training Support Centers, and eleven local training areas. The Hanau location is the logistical hub for northern Germany with the largest and most diversified exchange and commissary services in Europe.

The Hanau Base Support Battalion won the ACOE competition for large BSBs, and Darmstadt placed as third runner-up winner; the Group provided support for the movement of V Corps to Heidelberg, the closure of the Frankfurt facilities, and inactivation of the 418th Base Support Battalion.
